PREFACE.

In presenting another issue of the Directory, the publisher embraces the opportunity to express his thanks to that portion of the citizens, who are willing to, and do, in any degree, help to sustain it, which, while it includes every citizen who can honestly participate in the benefit which may be derived from its publication as a work of reference, does not, probably, amount to more than the tenth part of those of them who freely use it; the residue without paying for its use, as they should honestly do, even if they wish it only occasionally as a convenience.

We have heretofore remarked that the general arrangement and utility of Directories were so fully understood, that very few if any prefatory remarks in that respect were required, not so in regard to their support. In view of this, while in the compilation and publication of the Directory, we profess to have the public benefit particularly in view, it does not follow that we need entirely to lose sight of our own interest, consequently we write the preface particularly for that—in other words, WE WRITE THE PREFACE FOR OURSELVES. A considerable portion of the preface to the 4th issue is still as applicable as ever —we extract in part from it.

"For the last five years we have devoted nearly all our time to the work of establishing a Directory for Cincinnati, determined not to abandon the undertaking until we could present one to the city, which would be surpassed by none other published; and also one that would afford a profit to ourselves. This is our fourth publication, (*the present is our sixth,*) and we send it forth, feeling confident that after a careful comparison of it with all others, whenever or wherever issued, the unanimous verdict will be, that we have attained the *first* thing proposed. We are happy, also, to say, that with this we have succeeded in securing for the work, a support that will afford us a very plain, but decent living. We state this because we feel very sure that it is the first time it could be truly said in this city. Yet while we say that from the issue of this volume, we expect to derive a small profit, we must also state that for the five years labor which we have devoted to this work, as a whole, (which includes the present,) we have not received a profit of one single dime—WE HAVE NOT EATEN A SOLITARY MEAL AS THE FRUITS OF THE UNDERTAKING. Notwithstanding this, we believe we have secured the confidence of the citizens generally; even of those who never have, and perhaps never will do anything for its support, so far that they would di-

rectly oppose any other that might be started in competition to it. From a comparison of past years with each other, we flatter ourselves that for the future we may rely upon our undertaking for something more than a simple support; we should have it, and we intend to have it, and from this very work too, not by laying an additional tax upon those who have heretofore aided it, but by making it the *interest* of all to have it, of business men to insert their cards in it, and by placing such barriers as we can against the use of it by those who are unwilling to pay for the benefits they derive. Every citizen who wishes, even in a single instance, to use a Directory, should pay for its use. We are entitled to it from them as much as they are to be paid for any article they may furnish us, or for any service they may render us; and those who wish to make use of our labors gratuitously, shall not do so, with even an implied consent on our part. As one of the barriers, we have now given the work an additional name, 'Mirror.' A mirror is to reflect. We mean that ours shall reflect."

Directories are in their character local, calculated principally (*we might almost say solely*) to benefit the particular locality which they represent, they should, therefore, depend for their support, upon the citizens of the locality represented; consisting of cards of address and business, *all properly termed advertisements*, and such as should be paid for by each individual represented, (*all are directly benefitted by their publication*) they should receive their support from that source, and not from the sale of them to the comparatively few, who to benefit the public, would purchase a Directory, when by so doing they would pay equally as much for their neighbor's advertisement and convenience as for their own; yet, while each individual is at liberty *to pay* or *not to pay* for the insertion of his card, a proper distinction should be made in the insertion, so that those who pay, may receive the full benefit of the publication, while others are allowed the privilege, (*the act is their own*) of representing to the public, in connection with their card, that they are not willing to pay for that which their own individual interest and the public good requires, *thus making of the work* A MIRROR *in which each individual may see himself, and have a partial view of other citizens, according to their own representation.*

As this Directory is not sold, but supported only in accordance with the principles which have just been stated, citizens are referred to page 160 for information as to terms.

The names of streets and numbers as given in this issue, are those now in use. The alterations in the names of some of them, just made by the Council were too late to be incorporated in this, and if they could have been, they would not have answered as well for practical purposes, as the numbering will in many cases have to be altered before the new names will be of any use, and neither can be put up so that the public can become acquainted with them before the Spring and Summer months.

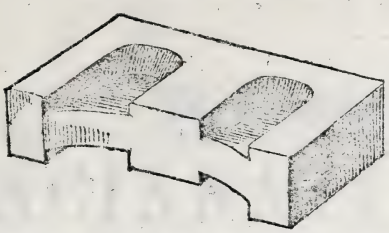
CONKLING'S



PATENT SCIENTIFIC BRICK.

The Subscriber offers for sale, by State and County rights, the right to manufacture and use his PATENT SCIENTIFIC BRICK.

CHARACTER OF THE BRICK.—This improvement consists in moulding and pressing Bricks in such a form as to secure the *least exposure of the mortar to the weather*, which seriously injures its durability and appearance, and also to provide for the *greatest possible cohesion of the mortar to the brick internally*, thereby securing the greatest solidity of structures.

MANUFACTURE OF THE BRICK.—The form of these Brick is adapted to all qualities and sizes of Bricks and building blocks of whatever material. They require no more skill or labor in manufacture than the ordinary form. For *Mould Brick*, the cavities are made only on the lower side, but deeper, by fastening two pieces of wood of suitable shape at the bottom of the mould. The top of the Brick is cut off as usual. For Pressed Brick, the cavities may be made on one or both sides, generally on one side only, leaving the upper side flat to receive a very thin layer of mortar or cement. These Bricks take from *eight to ten per cent. less material than ordinary Brick.*

BURNING OF THE BRICK.—These Brick are burnt in kilns as usual, but owing to the cavities the heat circulates more freely and thoroughly than in ordinary Brick, and burns the Brick more uniformly and quicker than the ordinary form. *A saving of more than twenty per cent. of time and fuel* is effected by this improvement.

LAYING THE BRICK.—They are laid as expeditiously as common Brick, and in the same manner, with as little mortar or cement between joints as is practicable to cement the surfaces and form a level bed for the courses, the whole to be grouted with thin mortar poured in the cavities. Walls thus made are solid and strictly fire-proof, and at least one-fourth stronger than walls of the same thickness, built of ordinary Brick.

THE LIGHT OF THE AGE.

No person is insensible to the comfort, the necessity and luxury of good light, either for domestic use or consumption in Stores, Warehouses, Hotels or Factories.

GAS! GAS!

is the only article now used that affords sufficient light to meet the wants of the times, and it has become *the desideratum* of the day (next to cheap bread,) to obtain cheap and good

GAS.

This we are prepared to furnish by

N. AUBIN'S NEW AND IMPROVED

GAS FURNACE,

To which was awarded the

GOLD MEDAL,

BY THE

AMERICAN INSTITUTE,

At their Annual Exhibition, at the Crystal Palace, in Nov., 1855.

It has been ordered by the Smithsonian Institute, at Washington City.

We have thus far held back, being determined not to offer our Furnaces to the public until they had been fully tested by use, as well as by the most scientific men of the age, and every defect or objection remedied. We are happy to say that this has been now accomplished.

We feel confident in offering our Furnaces to the Public, that they will meet with the reward of surpassing merit.

Such is the simplicity of this Furnace that it can be managed by any common laborer ; there is no danger of EXPLOSIONS, and is entirely free from the intolerable odor of the ordinary gas. In case any leakage should take place in the pipes, or by neglect to cut off the gas when not burning, the odor emitted is not injurious to either health or furniture. We have the

IMPROVED FURNACE

In our establishment, where parties wishing to see it have theopportunity of so doing. We are prepared to erect these Furnaces at our risk, and warrant them to produce a superior Gas, and at a less cost, by about one half, than the COAL GAS usually furnished by the incorporated monopolies of cities.

T. WRIGHTSON & Co.,

167 Walnut Street, Cincinnati.

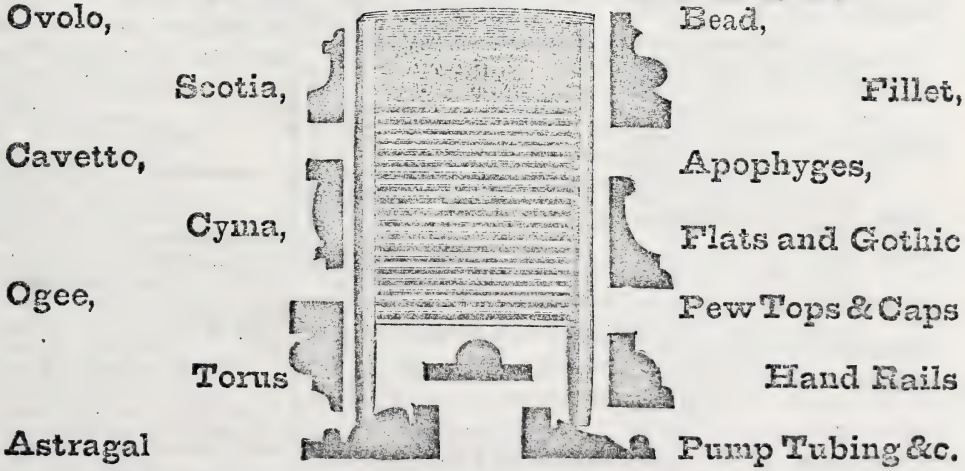
Wood Mouldings from one to ten inches wide, made by patented Machinery, twenty-five per cent. cheaper than by hand. Flooring boards furnished; Weather-boarding on hand or made to order, and re-sawing done by P. Crosby's Patent Saw Mill, together with all Circular Saw Work.

STYLES OF MOULDINGS.



Books of Patterns, containing the above styles, will be furnished gratis

PATENT INCISED ZINC WASHBOARDS.

Four machines, patented by, and exclusively used and controlled by the subscriber, are employed in the construction of this Board—inserting the zinc to double the depth of any other process—precluding the possibility of its coming loose, every part of the wood being thoroughly prepared for the reception of the same. An entirely new mode, pronounced by able mechanics to surpass any other Zinc Washboard now known. Persons ordering, may rest assured that their interest will be served as if they were present. The lowest possible freight procured in every instance.

RAILROAD RECORD:

AND

Journal of Commerce, Banking, Manufactures, and Statistics.

PUBLISHERS' CIRCULAR.

RAILROAD RECORD.

E. D. MANSFIELD.....Editor.
W. WRIGHTSON, T. WRIGHTSON, ...Associate Editors.

The title at the head of this paper expresses its plan and purpose. The Valley of the Mississippi is at this time engaged in works of gigantic magnitude, involving immense interests. Its Commerce has increased at a rate heretofore unknown in history. Its Navigation embraces thousands of vessels of various kinds. Its financial engagements extend over the globe; and its cities are rising to a population and wealth, commensurate with such a country and such a Commerce. The object of the Record is to promulgate authentic Statistics and reliable information of the Railroads, Banks, Manufactures, and Commerce of this great Valley, and thus, of course, aid the interests of that great body of the public engaged in them.

In pursuance of this object, the Record has furnished, and will continue to furnish, in still larger proportion, a great amount of Statistical Information on the Commerce, Agricultural, and Mineral Resources of the West. No other Journal has embraced so much information on these subjects: and we now add that it is our intention, in successive numbers during the year, to exhibit the entire Development of the Agriculture, Mineralogy and Geology of the West, so far as they furnish materials for commerce. We have already furnished views of the Vine and Indian Corn; and we intend to bring out successively similar articles on Wheat, Barley, Oats, Potatoes, Hops, Sugar Cane, Cotton, and Lumber. We shall accompany these with brief but complete views of the Coal, Iron, Lead, Copper, and Gypsum Regions of the West; the demand for the productions, and the effects of these developments on the Railroad System. This, when done, will furnish information which cannot be found in any one work.

The Stock Tables in the Record are made up from the actual sales in Cincinnati, New York, Philadelphia, and Baltimore, and are corrected from the latest information received up to Wednesday noon. The Stock Sales are from the reported public sales in Cincinnati and New York.

The circulation of the Record has already extended to every State in the Union, and is becoming more and more extensive. Finding its way as it does into the hands of Railroad Directors, Engineers, Superintendents, and others interested in Railroads, Banking, and Commerce, the Railroad Record as an

Advertising Medium,

offers superior facilities for bringing to the notice of the proper parties everything that has any connection with Railroads, Banking or Commerce.

New Inventions, also, unknown to many, yet very useful, may be thus brought to the notice of those who would be most likely to adopt them. In no portion of the Union is the progress of improvement in Railroads, Machinery, etc., more rapid than throughout the West and South, and at no point is information upon all subjects connected with Railroad progress more eagerly sought for than in Cincinnati. The publishers do not hesitate to say that the circulation of the Record is very extensive throughout these sections, and presents a certain means of bringing all inventions, improvements, etc., in machinery directly before those interested in their use

As a medium of advertising, the Daily Times, from its extensive circulation in Cincinnati, and the neighboring states of Indiana, Illinois and Kentucky, as well as all the principal cities of the Union, stands without a rival in the West.

THE DOLLAR WEEKLY TIMES

Has been recently enlarged and improved, and is now the cheapest and best weekly paper published in the Western country, if not in the United States. Since its first enlargement in July, 1852, when it was comparatively but little known throughout the West, its circulation has grown to be the greatest west of the Alleghanies, and bids fair to outnumber any in the East.

It is especially devoted to the advocacy of the great cause of FREE SPEECH and FREE THOUGHT, and should receive the patronage of every lover of his country, friendly to the great and glorious PRINCIPLES OF '76.

WILLIAMS'

CINCINNATI DIRECTORY,

City Guide and Business Mirror:

IS ISSUED ANNUALLY FROM THE DIRECTORY OFFICE,

NO, 194 WALNUT ST., COR. FIFTH.

The Directory has now been published six years, its support having greatly increased from year to year, until for two years past, it has met the expense of publication, and now begins to furnish a small return for the continual labor which necessarily attends the preparation of such a work; from which it may be fairly inferred that it will, as heretofore, continue to receive, annually, an additional support, and may now be said to be permanently established, although it has been done at a heavy expense to the publisher.

While an adequate support will enable us from year to year to improve it very materially, we now unhesitatinly invite a comparison with those published in other cities—it can lose nothing from it, as no city which at this time contains a population of 100,000 or more, is furnished with a Directory as full in proportion or equal in many other important particulars.

As Directories consist almost entirely of Cards of Address and Business—properly termed advertisements—each of which should be paid for as such by those represented, their support should be derived from that source, and this one in particular does rely upon that alone and not upon its sale, and it will be seen that it is not in any case sold, by reference to the following:

TERMS OF PUBLICATION:

The Directory is not Sold.—For the general purpose of benefitting the business of the City, and more particularly to increase the value of the pubtication to those who support it, one-fourth or more of each issue is distributed where no direct support is expected in return; these are sent to *Post Offices*, *Public Institutions*, the *Principal Hotels*, the most important offices of the *Principal Express Lines*, and many other places of business and general resort throughout the country, particularly the West; as well as exchanged for similar works published in other places, which are kept at the Directory Office for the use of such as have occasion to refer to them. The suppott which it does receive is,

1st. From Annual Subscribers, who have been and must necessarily continue to constitute its principal support. These pay two dollars per year. for which their names and card of address receive a conspicuous and very particular insertion, much more valuable to men of business than any other which they can have distributed for the same amount. With each of these in the distribution of the work, a copy of each issue is left, and their subscription is payable when it is delivered.

2d. From Subscriptions for a single year, only received when *paid in advance*.

3d. From Subscribers, who wish the work for *family use*, bound in an extra style, particularly adapted for the centre table—such will pay two dollars and fifty cents, when the work is distributed, if the subscription is an annual one, if not, in advance.

4th. From citizens who do not wish to receive the work, but simply to pay *as every individual whose name is inserted should do.* The names of such will be inserted in Capitals in the *alphabetical arrangement*, by paying twenty five ents, and an additional twenty-five. for each insertion (if any) which is requisite to be made in the business arrangement—*thus distinguishing them from others who (by their acts) represent themselves to be unwilling to pay for that which their own individual interest and the public good requires.* And,

5th. From Special Advertisements, the value of which in this work has become so generally known, that nothing need be said, except that special pains will be taken to make them still more valuable than heretofore. These are collected each and every year, and specimens of sizes, styles, prices &c., exhibited in orper to meet the wishes of all.

WM. R. FEE. F. W. FEE.

WM. R. FEE & BRO.,

QUEEN CITY

LARD OIL LABORATORY,

No. 49 East Front Street, South side, near Broadway,

CINCINNATI, O.

From the Report of the Committee of the Ohio Mechanics' Institute Fair, held in Cincinnati, May, 1855

NON-GELATINOUS LARD OIL, exhibited by MESSRS. WM. R. FEE & BRO., we consider a very good article, not only as a burning fluid, but it is also well adapted for oiling Machinery of all kinds, and especially that of a light character and fine finish. In this opinion, your committee are supported by the practical knowledge of many of the mechanics of the city, and also in its effects on some of the machinery running in the Institute during the exhibition. We therefore believe that the exhibitors have succeeded, to a great extent, in producing a substitute for Sperm Oil. The Gluten extracted from this Oil, during the process of manufacture, answers a good purpose for cutting screws and for oiling rough and heavy machinery. The Committee, therefore, recommend the Oil and Gluten to your consideration.

E. GRASSELLI, M. R. TAYLOR, } COMMITTEE.

MARSH'S PATENT REFRIGERATOR

MANUFACTURED SOLELY BY J. & J. M. JOHNSTON,

AT THEIR STEAM BOX FACTORY, SOUTH SIDE OF THIRD STREET, BETWEEN PLUM AND WESTERN ROW,

CINCINNATI, OHIO.

For the **Improvements** which are found in this **Refrigerator** over all others now in use, LETTERS PATENT were granted April 20, 1852.

In its internal structure, it provides a strong, simple and efficient means of appropriating to cooling purposes the water from slowly melting ice, and also all the condensing moisture of the atmosphere as it accumulates, without wetting the parts of the shelves which comes in contact with the articles placed upon them for protection.

One chief advantage is in the shape of the shelves. They are formed of corrugated or crimped sheet metal, the upper angles of which support the dishes or other articles above the water which runs in the intervening channels. The ice is contained in a chamber in the top of the Safe. The angular shape of its bottom directs the drip as it falls to one particular point on the upper shelf, the corrugated channels of which are filled to a certain point, and then the water passes down a small pipe at the end of the next shelf, which is filled in its channels in like manner; it then passes down to the next shelf, and so to the bottom, where it is finally discharged through a small tube, over which there is a cap, while at the same time it lets the water discharge. The angular shape of the bottom of the ice Box allows every drop of water to pass off as it melts, thereby preserving the ice a longer time than most other safes.

Uniformity of temperature is secured from top to bottom, and should it be desired at any particular time to lower the temperature, the form of the shelves will safely allow ice to be placed on any one of the shelves without injury to the surrounding articles. Other Safes are made with hollow shelves for the passage of water, but their shelves being double are much heavier, more costly, difficult to clean, and liable to burst from various causes. This one is light, safe, simple and cheap. They are made of all sizes, to accommodate Families, Hotels and Steamers. They can be made ornamental as furniture for dining rooms, or other positions persons may wish them to occupy. We invite all in want of a good and cheap Ice Safe, to call and examine these carefully, confident that they are nearer perfection in their way than all others now before the public.

☞ We are still manufacturing the OLD STYLE of Ice Chests, and are prepared to fill orders for all sizes.

LIBERAL DISCOUNT TO THE TRADE.

CINCINNATI COMMERCIAL SCHOOL.

The undersigned would respectfully inform the public, that his rooms are now open for the reception of pupils, and that his intention is to impart a thorough knowledge of the

THEORY OF BOOK KEEPING,

AS ALSO, TO QUALIFY HIS STUDENTS IN ITS PRACTICE,

PRACTICAL EXPERIENCE

IN ALL THE VARIED DEPARTMENTS OF COMMERCE,

BOTH FOREIGN AND DOMESTIC,

For near Thirty Years.

He thinks it unnecessary to enumerate all the Branches to be taught in his School, for the reason that a thorough knowledge of

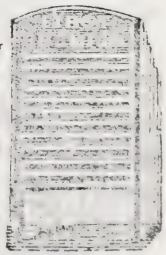
ZINC WASH BOARDS

FACTORY AT OLD ESTABLISHMENT

SOUTH SIDE OF FIFTH, CORNER OF HOME STREET,

Between Elm and Plum, Streets



Office at J. W. Wayne's Hardware Store, No. 136 Main street, opp. 5th, Cincinnati.

These superior Washboards received the FIRST PREMIUM at the "Ohio Agricultural State Fair," held at Cincinnati. Also, "FIRST DIPLOMAS" at the *last three Exhibitions* of the "Mechanics' Institute" of this city. All other brands of zinc washboards, in which the metallic plate is made to *incise or cut its way* into the wooden sides or legs of the Board, INFRINGE UPON SAID PATENT. This is the case with those heretofore made by J. B. Holmes, I. Abrams & Co., (late Winston & Co.) and G. Waters & Co., against whom suits at law are now pending. Dealers should be careful to purchase THE GENUINE ARTICLE ONLY, which will be found *superior in quality and as low in price* as any of the infringing makes.

HOUSE OF REFUGE.

EAST SIDE OF THE CUMMINSVILLE ROAD, ABOUT THREE-FOURTHS OF A MILE NORTH OF THE CORPORATION LINE.

Among the charitable and reformatory institutions of the city, none should hold a higher place in the estimation of citizens than the House of Refuge; for no one of them is better adapted to secure its future happiness and prosperity. The building up and supporting a place where the thousands of vagrant boys and girls, who rove about the streets—the future pests and criminals of society—can be taken, educated morally and intellectually, and trained to habits of industry, is a noble object.

Citizens may essentially, though indirectly, aid this object, by making it a point to furnish themselves with such articles as are manufactured by the inmates, from the store of the Institution, No. 2 College Building, Walnut street, between Fourth and Fifth.

is pre-paid, no account is taken of it, and it is ENTIRELY LOST TO THE SENDER. In the Prussian Closed Mail to Germany, thirty cents is the single rate, pre-payment optional. This pays from any part of the United States to any part of the German-Austrian Postal Union. A pre-payment of any sum less than the regular rate of thirty cents is not recognized, and is, of course, LOST TO THE SENDER; but every full rate of thirty cents is credited, whether the postage on a letter or packet is paid or not, leaving any balance due to be collected at the office of delivery.

The rule for rating letters, to all Foreign Countries (except the British North American Provinces and France,) is to charge one rate for half an ounce and under; two rates, if the weight is over one-half and not exceeding an ounce; four rates, if over one and not exceeding two ounces; six rates, if over two and not exceeding three ounces; and so on, charging two rates for every ounce or fractional part of an ounce over the first ounce.

The French Postage is rated by the quarter ounce for the single letter. To or from France, the single rate of letter postage, which must be collected in the United States, is as follows: By the New York and Havre line, twenty cents; by United States Steamers, via England, twenty-one cents; which pays to or from Liverpool, or Southampton, as the case may be, and by British Steamers, via England, five cents, which pays only to or from the port of departure in the United States. The balance of the postage in such instance, is collected in France.

Pamphlets and periodicals cannot be sent through Great Britain in the Prussian closed mail.

The postage on pamphlets and periodicals to all foreign countries except Great Britain and the West Coast of South America, has been reduced to the uniform rate of one cent an ounce.

Postage on newspapers either for or from Great Britain, two cents each; and there is an additional British postage of one penny, which has to be paid in Great Britain.

If the newspaper is to pass in the open mail through Great Britain, to or from some foreign country, the sum to be collected in the United States is four cents.

POST OFFICE DIRECTORY

FOR THE

STATE OF OHIO.

The list of Post Offices in the State of Ohio, which was first prepared for the last issue of this work, has been carefully and thoroughly revised with the additional offices since established. Citizens generally, and others who consult the Directory, will find it a useful appendage, and as Post Masters are generally business men, and such as, when properly applied to, are capable of, and will, freely furnish much useful commercial or other information relative to their respective Districts, it will contribute materially to the facilities of Merchants and Manufacturers in distributing their circulars, catalogues of Merchandise, &c.

Post Masters names are purposely omitted, as the changes are so frequent and numerous that it would be almost impossible to give anything like a correct list. The names of Post Offices are arranged alphabetically, with the name of the County in which they are located attached to each, which is amply sufficient as a direction.

In additon to the Directories furnished to subscribers, large numbers have heretofore been circulated by sending them to Foreign Hotels, Rail Road Depots, Public Libraries, &c.; knowing this kind of circulation has thus far materially increased the utility of the work, we wish it understood that it will be increased to any extent which the support it receives may warrant. Many Post Offices may be selected where a copy hung up would prove essentially useful to the community generally, as well as tend materially to advance the individual interests of subscribers and advertisers; information in this respect we shall at all times be glad to receive, and advertisers in particular are invited to aid in this kind of distribution by pointing out the names of offices to which it should be sent—it will be forwarded immediately.

STREET DIRECTORY.

The street Directory is simply an alphabetical arrangement of the Streets, Alleys, &c., with a sufficient portion of the corner numbers attached to each to make it a means by which citizens may become familiar with the system of numbering, and it will be found by them, as well as strangers, to be a practical guide to the different parts of the city, with the exception of the Seventh Ward, which has not yet been numbered. The action of Council in changing names of Streets, not only in that Ward, but throughout the city, came too late to be of any utility for the present issue. During the present year the necessary extension and revision of the numbering will be attended to, and this Directory will be made as perfect in that particular as possible.

EXPLANATIONS.—On all streets commencing at and running directly from the river, the odd numbers are on the West, and the even on the East side of the street, commencing at the river. On all streets crossing Main, the odd numbers are on the South, and the even on the North side of the street, commencing at and running East and West from Main, thus dividing each into two distinct streets, distinguished by prefixing East and West to the name. A few instances occur where two streets have the same name, generally one of them in the suburbs, not numbered. A * is prefixed to the one at present of the least consequence, to designate it.

It was thought unnecessary to give the corner numbers on both sides, where streets crossed. The odd ones are used in all cases, except where they (without crossing) proceed from or come to the one upon which the numbers are designated.
